

Blood Titers to Confirm Serologic Immunity to Disease

Blood testing to verify serologic immunity to disease must be ordered by a physician and performed by a licensed medical laboratory. Health insurance companies may or may not pay for such a test. Check for eligibility with your insurance company.

PHYSICIAN OPTIONS:

A student may use any physician and medical laboratory he/she wishes.

Michael Silvers, D.O., MPH with the Vaccine Center (formerly Immuvax) can provide these services to students who may not have other resources. A student who wishes to use The Vaccine Center's services may pick up a written lab prescription from the office and take it to any laboratory. The form will authorize the medical laboratory to perform the proper blood test to test for immunity. The results will be faxed to Dr. Silvers' office where the student can receive a copy and interpretation of the test results.

Dr. Silvers charges a fee of \$30 to order the test, receive the results from the lab and provide the student with a copy and interpretation of the results.

A separate fee will apply for the laboratory services.

PLEASE CALL AHEAD to confirm hours of operation.

The Vaccine Center

*7324 W. Cheyenne Ave. Suite 7
(west of US 95 on Cheyenne)
Las Vegas, NV 89129
