Blood Titer to Test for Immunity

Blood testing (blood titer) to determine immunity status should be ordered by a physician and an office visit charge may apply. The student has the option of seeking services at a laboratory of his/her choice; however it is always best to discuss this with the ordering physician.

Test results should be reviewed and interpreted by a physician. Do not depend on CSN faculty or staff to interpret test results.

Call laboratory of choice to inquire about current prices.

Test	Quest Diagnostics	LabCorp	Primex
Hepatitis A antibodies HepA Ab total	7285	006726	786
Hepatitis B IgG Antibodies	7292	006395	790
