College of Southern Nevada’s Applied Technology Department Presents

ET 100B Survey of Electronics - with Robots

An understanding of Electronics is key to many technical professions, i.e., Robotics Technician, Telecommunications Technician, Slot Repair Technician, Air Conditioning and Refrigeration and Technician, and many other fields.

Course Content: The course illustrates concepts from modern electronics technology using robots. The concepts covered include:

- Voltage, Current and Power
- Use of Microcontroller/embedded computers
- Sensors and output controls

Where and When:

Thursday Evening, 6:00-8:50 AM, West Charleston Campus
Call # 27428

Saturday Morning, 9:00-11:50 AM, Cheyenne Campus
Call # 27426
